

How much solar energy does Russia produce?

Russia's share of solar energy production is a paltry 0.03 percent of the country's total, and to meet its electricity needs the country relies heavily on traditional energy sources with high conversion efficiency, such as gas, oil, hydro and nuclear. Nevertheless, in the past three years Russia has been rapidly developing solar energy.

What is Russia's largest solar energy company?

With a capacity of 20 MW, it will power about 4,000 homes and will be launched in September. The Hevel Group ("hevel" means "sun" in the Chuvash language) is Russia's largest solar energy company, and was founded in 2009 by Renova and Rosnano, which have a 51-percent and 49-percent stake, respectively.

Does Russia have a solar power plant?

Nevertheless, in the past three years Russia has been rapidly developing solar energy. Kosh-Agachskaya solar power plant in the Republic of Altai was opened in 2014. In 2014, Russia opened its first solar power plant, and the country has 12 today. Soon the 13th will be launched.

How many solar power plants will Russia use in 2022?

In the near future, Russia plans to use another 334 MW of solar power in the Orenburg, Saratov, Volgograd and Astrakhan regions, as well as in the Altai, Buryatia and Bashkortostan republics. By 2022, Hevel plans to build solar power plants with capacity of up to 1 GW.

Where in Russia can solar energy be used?

The southern parts of Russia, especially the North Caucasus, have the greatest potential for solar energy. In 2010 Russia planned to set up an overall solar capacity of 150 MW by 2020. Plans for the construction of a new solar plant on the Black Sea have been announced and the plant is expected to begin operations by 2012.

Is solar energy a good investment in Russia?

Even though demand for solar energy in Russia is low, the Moscow-based company, Hevel, is producing solar modules with an energy conversion efficiency of 22 percent, which is the world's highest. In addition to Hevel, only two other companies in the world produce solar equipment with similar efficiency: Panasonic (Japan), and Sun Power (U.S.).

TotalEnergies is one of the top renewable energy players in the United States, with a portfolio of large-scale solar, storage, onsite B2B solar distributed generation, onshore and offshore wind projects. The Company aims to achieve a combined gross capacity of 10 GW by 2025 and more than 25 GW by 2030.
