A 100 MW solar farm would require approximately 587 acres (about 0.92 square miles) of land. To achieve equivalent daily production as a traditional power plant, a scaled-up 480 MW solar farm would need about 2,822 acres (about 4.41 square miles). This substantial land requirement is a significant consideration for our island's limited space.

In the Cayman Islands, several locations are ideal for the installation of off-grid solar and storage systems due to their remoteness, energy needs, and the potential to reduce dependence on ...
