

Why is the Solar Energy Association of Ukraine important?

As the last 2 years have shown, Ukrainians still have to fight for their right to clean energy, so the Solar Energy Association of Ukraine has a public duty to be a place of public opinion and unification of responsible business environment for the inevitability of our state's course to clean and safe renewable energy.

What is the optimal share of solar power in Ukraine?

Based on techno-economic modelling, we have determined the optimal share of solar power for the period 2027-30. The results show that 9.2 GW of solar generation capacity can be integrated into the Ukrainian electricity system by 2027 and up to 14 GW by 2030.

Does Ukraine have solar power?

In the years leading up to the start of the Russian war of aggression, the share of solar power in Ukraine's total electricity generation capacity had already increased significantly - from 5.9 GW in 2018 to 8.06 GW in 2022 - an increase in solar generation capacity of almost 37%.

How much solar power will Ukraine have by 2027?

The results show that 9.2 GW of solar generation capacity can be integrated into the Ukrainian electricity system by 2027 and up to 14 GW by 2030. This represents an increase of 8.4 GW compared to current capacity and will require an investment of almost EUR5 billion.

Can Ukraine recover power from a decentralized energy system?

Whatever the future, the decentralized nature of some clean energies, in particular wind and solar, has allowed Ukraine to quickly restore power in ways that would be impossible with Ukraine's more traditional energy sources, such as coal-fired power plants.

1. Amway Ukraine. On November 3, 2003, LLC Amway Ukraine, the 56th official representative office of Amway corporation, began its work.
