

What is the energy sector in Vietnam?

Vietnam is a dynamic developing economy with a relatively high growth rate. The energy sector plays a key role in promoting the country's socio-economic development. Vietnam has a diverse energy fuel resource of various types such as coal, natural gas, petroleum, hydropower and renewables such as solar and wind energy.

What energy resources does Vietnam have?

Vietnam has a diverse energy fuel resource of various types such as coal, natural gas, petroleum, hydropower and renewables such as solar and wind energy. The country has recently been successful in renewable energy deployment, especially solar and wind power development. Coal has been the key power generation source since 2018.

Why is Vietnam a major emitter of carbon dioxide?

Coal accounted for about 30% of installed capacity and 47% of electricity generation in 2021. The high use of coal makes Vietnam an increasingly important emitter of carbon dioxide, contributing to climate change. Table 1: Progress of primary energy supply between 2000-2015 in kilotonnes of oil equivalent (KTOE)

Why is coal a major source of electricity in Vietnam?

Coal has been the key power generation source since 2018. Coal accounted for about 30% of installed capacity and 47% of electricity generation in 2021. The high use of coal makes Vietnam an increasingly important emitter of carbon dioxide, contributing to climate change.

Our direct sourcing from top manufacturers ensures competitive pricing and the latest technology. Our experienced team designs customised solutions and provides seamless service from project planning to ongoing maintenance.

How much energy does Vietnam use per year?

In 2017 the energy intensity of Vietnam's economy (E/G) was 5.7 MJ per year-2010 US\$, above the world average of 5.2. That was also higher than other ASEAN countries, for example Thailand (5.3) and Indonesia (3.5). This reflects the high level of energy use associated with Vietnam's industrialization and its heavy reliance on coal.

As one of the countries most severely affected by climate change, Vietnam has been making great efforts to cope with climate change and pursue sustainable green development. Vietnamnet.vn ... The assistance also comes in attracting investment in renewable energy, enhancing energy efficiency, upgrading the power grid infrastructure, and ...
