

Warren solar Venezuela

Does Venezuela have a solar panel factory?

The engineer says: "It's incredible, but in Venezuela, in the industrial region of Paraguaná, we have a solar panel factory, but it doesn't have any staff. There's materials in the storage facilities to produce for three years and supply the entire country with alternative systems."

Should Venezuela be filled with photovoltaic panels?

Venezuela should have been filled with photovoltaic panels a long time ago. But the electrical emergency is opening up a small path for this energy source, and the state hasn't taken advantage of this technology yet.

What is a hybrid energy system in Venezuela?

In 2005, hybrid systems that mixed energy from the national electric grid with solar energy, eolic energy, and diesel fuel backup started being installed in Venezuela, with the Sembrando Luz program from the Foundation for Development of the Electric Service (Fundación para el Desarrollo del Servicio Eléctrico, FUNDAELEC).

Where in Venezuela has no electricity?

On October 12th, for instance, areas in Miranda, Vargas, Aragua, Carabobo, Yaracuy, Lara, Zulia, Mérida and even the metropolitan area of Caracas had no electricity. The Venezuelan capital goes through at least 20 power outages per month, ranging from eight to 60 hours long.

Are home generators a problem in Venezuela?

Just like in the Venezuelan plains, electric outages with no prior warning on the Venezuelan Andes can go on for over eight hours at a time. But the use of home generators, which used to be a solution, is now a problem and a burden because of the fuel shortage, its distribution priorities, and the cost if you do get your hands on it.

Is this the right time to invest in energy in Venezuela?

In Maturín, Monagas State (eastern Venezuela), Anderson Da Silva, chairman of EKOVA Energía y Comunicaciones, agrees with Méndez: "I really believe that this is the right time to invest in this type of energy in Venezuela. People are catching on to how reliable it is."

Bombas de agua solares superficiales y sumergibles, funcionamiento directo con paneles solares, aptas para llenado de tanques automáticamente, aplicación para aspersores o distribución de agua por gravedad, llenado de lagunas, entre otros tantos usos dentro del campo y el hogar.
