

Why are people moving to solar power in Yemen?

The migration to solar power is part of what researchers say is an energy revolution in the country of 28 million, where the electric grid has been decimated by fighting. More than 50 percent of Yemeni households rely on the sun as their main source of energy, and solar arrays power everything from shops to schools to hospitals.

What is the Solar Power Revolution in Yemen?

The solar power revolution in Yemen has clearly saved lives-- it has,for example,powered hospitals and medical clinics. It has also transformed lives.

Is solar power a lifeline in Yemen?

"For many in Yemen,especially for farmers,solar power has been a lifeline," says Matt Leonard,who specializes in microfinance with IFC. "The key now is to scale up its use." Yemen has long been the poorest country in the Middle East and North Africa,but a conflict that broke out in 2014 has pushed the country to the brink.

Is solar power the main source of energy for Yemeni households?

According to the EADP, which focuses on access to clean and affordable energy, solar power went from being a niche product, used in just a few households in 2012, to the main source of energy for Yemeni households.

How much does a solar system cost in Yemen?

Rassam paid about 50 million Yemeni rials (around \$90,000 based on the unofficial market exchange rate) for his system,which is considered large by local standards. The average cost of an array is around \$10,000. Rassam financed the solar panels with a loan from Al Kuraimi Islamic Bank,one of the country's largest private lenders.

Is solar power to blame for Yemen's water crisis?

A report published this week by the Conflict and Environment Observatory in the UK has concluded that,while the lights may be on all over Yemen now,very soon there might be no water. And,they suspect,it is solar power that is to blame.
